

Part B – Google Workspace: Digital Literacy Awareness Quiz

I built a **5-question Google Form** that can be used as a Digital Literacy Awareness Quiz for batchmates. The form includes:

#	Question	Type
1	What is Digital Literacy?	Multiple Choice
2	Which of these is a safe password practice?	Multiple Choice
3	Name one platform used for professional networking.	Short Answer
4	What should you do if you receive an unknown OTP?	Multiple Choice
5	What is the National Cyber Crime helpline number?	Short Answer

The form is linked to a Google Sheet that automatically collects all responses in real time

Quiz

Reflection

HackerRank taught me how competitive programming platforms standardise input/output — a concept I had never thought about before. The Google Form exercise was more useful than I expected. Building the quiz questions forced me to think about what digital literacy *really* means from a student's perspective. I realised that most students know they should use "strong passwords" but very few know *what* makes a password strong. These tools — one for practising skills, one for collaboration — will be essential throughout my four years at VIT Bhopal.
